**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/09/05 has been entered.

Claims 94, 108, 109 and 117-120 are pending in the application and were examined on their merits.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1655

Claims 94, 108-109 and 115-120 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Sananaka et al. (1995) or Masahiro, H (1995) or Zhang et al. (1995) or Tamiko et al (1994) for the reasons of record.

Applicant's arguments were fully considered, but not found persuasive.

Applicant argues 'one of ordinary skill in the art would reasonably expect that higher doses of ginsenoside Rb1 generate superior therapeutic results. Conversely, one of ordinary skill in the art would not have a reasonable expectation of obtaining a desirable result by reducing the dose of ginsenoside Rb1 administered iv to a [sic] patients based on the Zhang Model 1 experimental data" (p. 7, Arguments). However, as explained in previous Office Actions, variation of dosages of known pharmaceutically active ingredients is routine in the art. While the ordinary artisan would not have a reasonable expectation that a lower dose of Rb1 would have any greater effect on the MCAO models as presented by Zhang, the ordinary artisan would have a reasonable expectation that a lower dosage of Rb1 would be effective for clearing less obstructed ischemic areas. Further, it is noted that the unexpected results as asserted by Applicant is not commensurate in scope with the claims. The claims are broadly directed toward any type of apoptosis with any ginseng components. Thus, it is deemed that although Applicant's arguments are convincing for the particular brain ischemic model as presented in the Instant specification concerning the administration

of Rb1, they are not convincing for the broadly recited claimed invention. Thus, claims limited to brain infarction as well as Rb1 may be allowable.

No Claims are allowed.

This is an RCE of applicant's earlier Application No. 10/070,209. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
